Profile

Passionate Front-End Developer with 4 years of experience on various projects. While primarily focused on Front-End development, I also have minimal Back-End experience. I can adapt easily, write clean code, solve problems, collaborate well, plan ahead, learn quickly, and manage my time effectively.

Experience

During an internship at my school, I worked on making websites that are both functional and responsive. I not only helped develop them but also collaborated with a team to ensure they were user-friendly and performed well. This hands-on experience improved my understanding of Full Stack development, and I utilized Stack CRUD.

Projects

[GGshop](#)

Developed the front-end side of an E-commerce website using Typescript, React.js, and CSS. The project aimed to create a user-friendly and visually appealing online shopping experience.

[Coiny](#)

Developed a dynamic website utilizing CSS, Bootstrap and React.js, integrating real-time currency information and cryptocurrency calculator through Rest API. Leveraged React hooks to enhance user interaction, providing a seamless experience for staying informed about cryptocurrency values.

[Sudoku](#)

Created a Sudoku game with JavaScript, employing efficient coding practices and well-organized functions for game logic. The project demonstrates problem-solving skills and attention to detail in ensuring game works smoothly.

Skills

Front-end

HTML, CSS, SASS, Bootstrap, JavaScript, TypeScript, React

Back-end

Node.js, Express, MySQL, Firebase

More

Linux, Git, GitHub, Rest API

Education

KITM

Professional qualification degree in full stack web development (2.3 year length)
