Profile

Hello, I'm Justas Stankevičius, a junior front-end developer with more than three years of experience on various projects. While primarily focused on front-end development, I also have minimal back-end experience. I am enthusiastic about continuous learning, staying updated with industry trends, and enhancing my skills. Eager to bring my passion for web development to a team that values creativity and innovation, I am ready to collaborate with like-minded professionals who share my enthusiasm for creativity and innovation.

Experience

During a month-long internship at my school, I engaged in practical experience, actively collaborating on the design and implementation of functional and responsive websites. My role involved not only contributing to the development process but also working closely with a team to ensure the websites met high standards of usability and performance. This invaluable experience allowed me to apply my skills in a practical setting, further enhancing my understanding of web development. Used technologies such as CSS, React.js, Node.js, MySQL.

Projects

Coiny

Developed a dynamic website utilizing CSS, Bootstrap and React.js, integrating real-time currency information and cryptocurrency conversion through Rest API. Leveraged React hooks to enhance user interaction, providing a seamless experience for staying informed about cryptocurrency values.

Portfolio

Designed and implemented a responsive portfolio website using CSS, Bootstrap and React.js, featuring a clean layout and intuitive navigation. The site showcases a variety of projects and skills, with a focus on user experience.

Sudoku

Created a Sudoku game with CSS and JavaScript, employing efficient coding practices and well-organized functions for game logic. The project demonstrates problem-solving skills and attention to detail in ensuring game works smoothly.

Skills

Programming Languages
HTML, CSS, SASS, JavaScript
